It will not do to say, "I don't care who is elected, as between Greeley and Grant," We do not belong to that class. We desire the defeat of Gen. Grant, and the people's only chance to defeat him is through Horace Greeley. We believe that Mr. Greeley can defeat him, provided all the opposing elements to Gen. Grant can be united. They can be united. But such union can never be effected whilst any portion of our people remain indifferent. A voter who is indifferent, is in a political sense, worthless. The friends of Gen. Grant in this State are not at all indifferent to his success. They want him elected, and with might and main are working hard for him. In this respect let their example of

JAMES WATSON WEBB, ON GRANT James Watson Webb has written a caus-. tic letter on Gen. Grant, whom he denounces for his unscrupulous management and disregard of his one-term pledge. We quote the following:

When, as is known, the President (through ignorance or inadvertance no doubt) negected to invite the Grand Duke of Russia to dine with him, or as the Russian saying is, "to break bread with him, as an evidence of friendship, the Emperor and all St. Petersburg felt out-reged. And when, subsequently, the President telegraphed to the Grand Duke at St. Louis to return and dine with him, and the Grand Duke tele-graphed to St. Petersburg inquiring what he should do, the answer was "decline peremptorily." Of course, this was a subect of every-day discussion in St. Petersburg, and on one of those occasions a Russian gentleman who had been at Washington quietly responded, "if our Alexis had been the owner of a fast horse, or a passably good groom, doubtless Gen. Grant would have invited him to dinner."

I believe, too, that if there are politicians who think that Greeley, when elected, can be easily moided to their wishes, they are destined to be greatly disappointed. Right or wrong, he will, if elected, be President; and hemmed in as he is on all sides, by a public life in which he is fully committed upon all ques'ions of national policy, he cannot go astray if he would; and I believe him too honest to entertain any such desire. It was a covenant between a convention and its President to be elected, that he should trample the constitution into dust by a covenant that any tariff bill should become the law without being sent to, or considered or signed by the President, or if sent to and signed, that this should be a mere farce or form, because the covenant bound him to leave them wholly unconsidered. This made the covenant a conspiracy and its execution treason, for which the

when it would have been wiser and juster to have been temperate and kind, I can only say that from the time when I first entered upon the discussion of public affairs to this hour, I have not much regarded party, considering party always simply a means to an end ten times more important to the well being and upright conduct of our Government and our people. Always acting upon that conviction, I have sometimes alienated friends on either side, now here and now there. But this was indespensa-ble to independent and honest

political conviction. No man has ever yet pursued a thoughtful, observant, manly and independent course without sometimes offending and alienating friends here and there. He must do so if he is to be at the course with the case. At my house Mr. Douglass, while speaking not unkindly, said that he felt the President's neglect in not inviting him to dine, which was more and there. The grand result, the forwardment of mankind, is created by agitators, by the men who stand out, by the men who dare be wiser to-day than their fathers were the day before yesterday (applause.) I can only say for that class, the class of whom I sir, that if there is any mistatement, or as am a representative, the class who are said | you express it, perversion of facts, it is not to be agitators, this: That many times when a man is accused of absorbing ambition he has been thinking not of the plaudits of the multitudes, not of chances or prospects of personal elevation; very often his mental elevation; very often his mental eye has been fixed on some cottage in the land of his boyhood where sits an aged mother, widowed, perhaps gray, wrinkled and tottlering, dividing her attention between that book wherein are gathered up all her hopes of blissful

immortality, and these journals or records wherein she reads the story of her son's efforts, possibly achieve-ments, and hope for the day when he may return and find her still living to greet and nonor him, as no shout of an applauding multitude can do. So I say that tens of thousands who are misjudged as looking for some grand opportunity for themselves or advancement for themselves, are thinking only of some spot where fond affection keeps watch over its loved one's career and hopes that it may be, if not distinguished, at least useful to the Friends and neighbors, I am older than I was when our late terrible trial began, much older in feeling and in years, but old as I am I have an ear still I think not deaf to the call of duty.
